(54) SHPPING MANAGEMENT SYSTEM

(57) Abstract:

PROBLEM TO BE SOLVED: To improve the working efficiency of temporary storing work by instructing a temporary placing area capable of temporary storing every time on the basis of packing result data.

SOLUTION: A packing instruction book and packing label 3 is automatically issued on the basis of a vehicle allocation plan data 1b and a packing plan data 1a. A temporary storing area for waiting for shipping is instructed every shipping vehicle number and registered in a shipping management system. A packing work is executed according to the packing instruction book and packing label 3. After finishing the work, the packing label is attached to the package, and the packing result data is added up to a shipping management computer 2 with the packing number as a key. The instruction of temporary storage for designating a registered temporary placing area is supplied from the shipping management computer 2 to a temporary storage management terminal 5, and the package is carried on the basis of the instruction and stored

in the temporary placing area for temporary storage. The temporary storage result data is added up to the shipping management computer 2 with the package number as the key.
